Karthikeyan P A

Chennai, India, +91 8270476292, knkarthi446@gmail.com

Summary

Detail-oriented Automation Test Engineer with over 2 years of experience in designing and implementing robust testing frameworks. Proficient in Selenium WebDriver, Java, TestNG, and Jenkins CI/CD pipelines, with a proven ability to reduce manual testing effort by 40% and improve test maintenance by 30% through POM framework development. Skilled in API testing with Postman and REST Assured, and adept at collaborating in Agile environments to ensure high-quality software releases.

Work Experience

Automation Test Engineer

Chennai, India

12/2022 – Present

Nomadia India Pvt. Ltd.

- Engineered a Page Object Model (POM) framework utilizing Selenium and Java with TestNG, reducing test maintenance effort by approximately 30%.
- Automated over 300 regression scripts, achieving more than 70% coverage and decreasing manual testing effort by 40% across multiple releases.
- Configured Jenkins CI/CD pipelines, implementing both freestyle and declarative approaches for scheduled nightly runs and event-triggered executions.
- Directed peer code reviews, resulting in a 30% reduction in script failure rates through implemented design enhancements.
- Executed API testing using Postman and am currently extending API test coverage with REST Assured.
- Enhanced locator strategies and parallelized test suites, significantly decreasing regression cycle execution time.
- Engaged with Development, Product, DevOps, and Analyst teams within Agile sprints, authoring test cases derived from project requirements.
- Spearheaded web automation and security testing initiatives as a Territory Manager, automating regression suites and deployment validation workflows.
- Minimized manual effort by 40% through the automation of tasks involving Excel and PDF document processing in the Territory Manager role.
- Conducted comprehensive functional, regression, API, and security testing as a Territory Manager.
- Automated core modules, including route planning and scheduling, for the Toursolver project, encompassing manual and automation testing, as well as API and security testing.
- Elevated regression automation coverage to over 70% for the Toursolver project.
- Integrated automation processes with Jenkins to facilitate nightly execution for the Toursolver project.

Education

Alagappa University

Karaikudi

2019 – 2022

Bachelor of Science, Computer Science

Skills

Selenium WebDriver	Playwright-Typescript
Java	Python
TestNG	JUnit
Page Object Model (POM)	REST Assured
Postman	Maven
Jenkins (Freestyle & Pipeline)	Git
Tortoise Mercurial	Regression
Smoke	Functional
Integration	OOP Concepts
Agile/Scrum	Test Design
Analytical Skills	Debugging
